BECOME A HEATCRAFT™ CERTIFIED CONTRACTOR*

Differentiate Your Business with IntelliGen™ Refrigeration Controller Training

This course is a deep dive into the sequence of operation, installation, setup, service, and troubleshooting of the IntelliGen™ refrigeration control system. Defrost logic options are compared to standard electromechanical equipment. The content is presented as a two-day event.

March 10th & March 11th (2-day course)

Limited Seating - Twenty (20) Participant Capacity

TUESDAY & WEDNESDAY | 8:00 AM - 4:00 PM

Lunch will be provided

RSC-COLUMBUS Training Room

2571 Silver Drive | Columbus, OH 43211

Investment: \$500 per person

Attendees will receive a prequalification test and must pass with 80%

DAY 1

March 10th

Includes an overview of Heatcraft products with an emphasis on component access, including connection points for refrigerant connected tubing, plus high and low voltage connections. The content includes a discussion of possible applications of Heatcraft's portfolio of products.

DAY 2

March 11th

Immerses the student in the IntelliGen sequence of operation, installation, setup, and troubleshooting of the user interface, the iRC control and the various control features and options available when using the state-of-the-art control. Five hands-on activities are part of the learning process throughout this course.
